

What is it?

The Sasquatch is rich, full fuzz based on the old school, Dallas Arbiter Fuzz Face circuit. The Sasquatch has been modified to be more balanced and efficient while retaining all the classic tones everybody wants in a killer, Germanium fuzz. It also has a cool freakout mode that sounds like nothing you've ever heard before.

How does it work?

Check to see if your Sasquatch came with a 9 Volt battery. If for some reason it didn't, make sure to use an alkaline battery or just use the negative tip DC power jack.

At first glance the controls may not seem to make much sense. Here's a breakdown of what they do...

Find Him = Turns the effect on

Howl = Volume

Growl = Fuzz

Hungry = Bass cut

Full = Original, bass boost

Make Him Mad = Engages the freakout mode

Anger = Amount of freakout

Enter = You plug your guitar into here

Exit = Well, just guess...

"Howl" and "Growl" are pretty self explanatory after you start tweaking them. When you want to "Make Him Mad" make sure you have your "Howl" turned all the way up, then start turning the "Anger" knob until you have a nice balance of fuzz and noise. If you turn the "Anger" knob all the way up, you can control the pitch of the feedback with the volume, tone and switch on your guitar. You'll have hours of fun irritating anyone in the vicinity.

Note: You can only control the "Make Him Mad" freak out mode with the controls on your guitar if your guitar is plugged directly into the Sasquatch. Any pedal that is before the Sasquatch in the signal chain will override this control.

Note for bass players: The Sasquatch has Germanium transistors which are sensitive to the type of signal that is given to them. To get the most out of your Sasquatch, be sure to use a bass with passive electronics.

What if it breaks?

All Tortuga Effects have a **Three Year Warranty**. I want you to be confident in the fact that your pedal will always work, so if you have any problems with it ("problems" do not include dropping it, backing over it with your truck or dropping it and backing over it with your truck) please contact an authorized Tortuga Effects dealer or just contact me directly and I'll get it taken care of.

Enjoy your cool new noisemaker!
