

# WENDIGO™

## What is it?

The Wendigo is rich, tight fuzz based on the old school, Dallas Arbiter Fuzz Face circuit. The Wendigo has been modified to be more balanced and efficient while retaining all the classic tones everybody wants in a killer, silicon transistor fuzz. It also has a cool freakout mode that sounds like nothing you've ever heard before.

## How does it work?

Check to see if your Wendigo came with a 9 Volt battery. If for some reason it didn't, make sure to use an alkaline battery or just use the negative tip DC power jack.

At first glance the controls may not seem to make much sense. Here's a breakdown of what they do...

**Find Him** = Turns the effect on

**Howl** = Volume

**Growl** = Fuzz

**Hungry** = Bass cut

**Full** = Original, bass boost

**Make Him Mad** = Engages the freakout mode

**Anger** = Amount of freakout

**Enter** = You plug your guitar into here

**Exit** = Well, just guess...

"Howl" and "Growl" are pretty self explanatory after you start tweaking them. When you want to "Make Him Mad" make sure you have your "Howl" turned all the way up, then start turning the "Anger" knob until you have a nice balance of fuzz and noise. If you turn the "Anger" knob all the way up, you can control the pitch of the feedback with the volume, tone and switch on your guitar. You'll have hours of fun irritating anyone in the vicinity.

**Note: You can only control the "Make Him Mad" freak out mode with the controls on your guitar if your guitar is plugged directly into the Wendigo. Any pedal that is before the Wendigo in the signal chain will override this control.**

**Note: It is normal to hear a slight high pitched squeal on sustained notes when you have the "Howl" and "Growl" turned all the way up. Try turning the "Growl" back just a hair and it will go away. This will not change how the "Make Him Mad" feature works.**

**Note: Make sure to use only high quality cables with your Wendigo.**

## What if it breaks?

All Tortuga Effects have a **Three Year Warranty**. I want you to be confident in the fact that your pedal will always work, so if you have any problems with it ("problems" do not include dropping it, backing over it with your truck or dropping it and backing over it with your truck) please contact an authorized Tortuga Effects dealer or just contact me directly and I'll get it taken care of.

Enjoy your cool new noisemaker!
